2020 Breeding Contract Continued

Due to the fact that Redwine is EVA positive, the following protocol must be followed:

Following first time insemination, mares must be isolated (no nose to nose contact) for a 21 day period, to afford ample opportunity for cessation of possible viral shedding via the respiratory tract. Should such mares fail to become pregnant, she can be bred back to a Redwine without the need for an additional 3-week isolation period post-insemination. Please feel free to contact us directly with any questions or concerns you may have with regards to this protocol.

Stallion owner is not responsible for any semen shipments that are lost, delayed or damaged during transport. This semen must be administered by a licensed veterinarian or by a breeding technician approved by Ashland Farm, on the day of delivery, or the LFG and the contractual obligations may not apply.
